

## CABLE CHANNELS / CABLE BRIDGE / CABLE TAPE

### *Unmercifully...*

that is how some supply cables are stepped on in crowds or flattened by the tour truck. These compact, low, modular cable channels are the solution and offer optimum protection for your cables. Also they save you the time-consuming task of checking and sorting out the cables after the event. "So you can do it all again tomorrow!"

The cable channels are made of light-weight, impact-proof plastic, with a yellow cover and comply with the applicable warning and safety norms.

The ideal "security" for all professional VA-technicians..

B x H outside: 535 x 50 mm

B x H inside: 5 channels 35 mm x 35 mm

Weight: approx. 13 kg per m

Color: black with yellow cover

A reasonable alternative is the cable guide tape, with simultaneous warning and identifying function.

Application example

SCT145-GE/SW

ORDER-NO.	Description
BRM87-G	Cable channel straight, 870 mm
BRM-W45	Cable channel with 45°-angle
BRM-E	End piece for cable channel
SCT145-GE/SW	Safety cable tape 145 mm x 30 m
