

METER COUNTER MISTER METER

by the running meter...

For cables of up to 30 mm in diameter our Mister-Meter measures the cable length precisely. Without question - this practical devise is fantastic, there is nothing available that is better. Before starting to measure you just reset the button to zero. The cable is pulled through, all you do is to read the required measurement and stop at the desired length. Also suitable as a hand or table unit. Robust, practical, and dependable. Tolerance: +/- 2 %.

Two adjustable restrainers ensure that the cable is guided evenly and prevent "swerving" or "slipping", which may lead to unsatisfactory measuring precision.

Cable meter counter with removable handle.

ORDER-NO.	W x H x D (mm)
