

## AES/EBU DIGITAL AUDIO ADAPTERS

The Canare BCJ-XJ-TRB (XLR-F to BNC) and BCJ-XP-TRB (XLR-M to BNC) adapters are a cost-effective solution for long cable runs over coaxial cable as opposed to the attenuation of twisted pair at digital frequencies.

The adapters provide impedance matching between 75 Ohms and 110 Ohms, electrical isolation, transition of balanced/unbalanced circuit, and reduction of hum and noise.
