

FSR FLOOR POCKETS

FSR Floor Pockets are designed to fit the needs of power, audio, video, and data applications and provide a practical solution for cable storage while maintaining easy access. The cover has a large, lift-off section for access to internal cables and connector plates while a smaller trap-door creates a cable exit. The sturdy 11 gauge cover lies flush with the floor while the brass or aluminum edging is only partially seen through the carpet. Two angled brackets are provided with a single, double, and a four gang opening for connector mounting. Standard wall plates are additional.

FL-500P

FL-500P is designed for rooms with carpeted floors over concrete. The edging is available in 1/4" or 1/2" heights. Adjustable leveling feet are included.

Box Size: 10" x 12" x 6". 4" depth available

Cover Size: 10 1/2" x 12 1/2" x 1/8"

Edging Height: 1/4" or 1/2"

Edging Material: brass or aluminum

Knockouts: Total of 8, either 1 or 1 1/4"

Weight: 16 pounds

FL-540P is similar in design to the FL-500P, except it has a mounting flange designed to drop into raised access carpeted floors.

Box Size: 10" x 12" x 6". 4" depth available

Cover Size: 11-1/2" x 13-1/2"

Edging: 1/4"

Edging Material: brass or aluminum

Knockouts: Total of 8, either 1 or 1-1/4"

Other FSR boxes for non-carpeted floors are available.
