

# HOTBOX<sup>®</sup>

Our top-of-the-line DI is an active direct box that operates with batteries or phantom power.

Its super-clean front-end circuitry delivers extremely wide and flat frequency response and will reveal hidden harmonics from guitars and basses with high-output passive pickups.

## Features include:

- **1/4" parallel wired in/out jacks**
- **Ground Lift switch to help eliminate hum and buzz**
- **Input switch selects between OFF, ON or ON with PAD engaged** (20 dB PAD for connecting to strong line level signals or power amp outputs.)
- **LED indicates "ON" status**

## Model # - HOTBOX

Input Impedance: 1 Meg Ohms

Frequency Response: 20Hz-150kHz  $\pm$ 3dB

Residual Output Noise: -115dB

Maximum Input Level: +15dBm - battery, +20dBm - 48V phantom. Add 20dBm with pad engaged

Power Requirements: (2) 9V batteries or 48V phantom

Battery Life: approximately 300 hours

Current Draw: approximately 4.0mA DC
